

LED Light Options

Outfit for Life™

www.4are.com

A.R.E.'s new lighting philosophy is simple... **There is no such thing as too bright!** We are proud to introduce our new **LED interior lighting options**, which will allow our customers to choose from "bright" to "get out your sunglasses bright!"

The new 3 LED 12 Volt Light is our new basic lighting option. It replaces the optional incandescent 12 volt light that the industry has used for decades, and is quite noticeably brighter than its predecessor. This light is mounted inside the truck cap just above the rear door.

LED Lighting Features

- Wired into truck's existing electrical system
- Far brighter than incandescent
- Rated for 100,000 hours vs 25,000 hours for incandescent
- Uses less energy and creates less heat than incandescent

4' Center Rope Light - fiberglass truck cap without fabric interior liner.

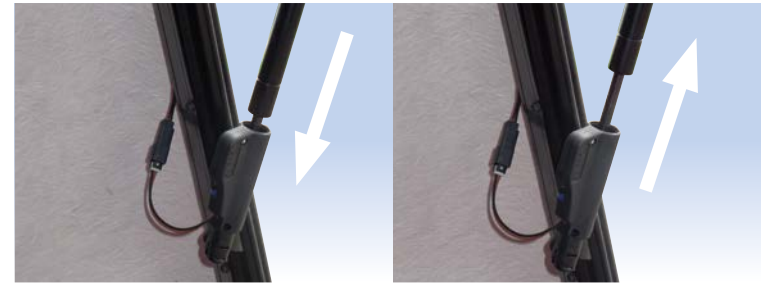

4' Center Rope Light - fiberglass truck cap with fabric interior liner.

Double the effect with two 4' LED rope lights!

Side Window Rope Lights are automatically activated when the door opens!

Optional Prop Switch turns your lights on/off, when you open/close your door!

New - Toolbox Rope Lighting Option. The light turns on/off when the door opens/closes.
